EDUCATION

Lovely Professional University

Bachelor of Technology in Computer Science, Honors in Data Science-CGPA:8

Phagwara, Punjab

August 2022 – June 2026

Chowkhali High School

SSC - 72 pct — HSC - 84 pct

Chandipur, India

Jan 2020 - April 2022

EXPERIENCE & TRAINING

Meetmux | Android Developer Intern

Jun'26 - Present

- Engineered native Android applications using Kotlin and the Android SDK, extending core features and functionality.
- Built responsive UI components and application features, integrating RESTful APIs and backend-driven data workflows.
- Collaborated with the development team to debug issues, streamline application performance, and ship production-ready features.

Transorg | Data Analyst Intern

Jan'26 - Jun'26

- Analyzed and transformed structured datasets using Python, Pandas, and SQL to generate actionable business insights.
- Performed data cleaning, preprocessing, exploratory data analysis, and visualization to identify trends and anomalies.
- Delivered data-driven reports and dashboards using Python and SQL to support business analysis and decision-making.

18.h Consulting | React Native

Jun'25 - Jul'25

- Architected cross-platform mobile UIs in React Native, focusing on modular components and reusable layouts.
- Configured Firebase for secure authentication, real-time data handling, and cloud storage.
- Applied state management best practices and performance optimization techniques to improve app responsiveness.

Cipher Schools | Java Full Stack using Spring Tool Suite

Jan'25 - Feb'25

- Developed dynamic web applications using Java, Spring Boot, JSP, JDBC, and MySQL with scalable architecture.
- Implemented and refined RESTful APIs for efficient backend processing and data management.
- Optimized database queries and application workflows, reducing response time by 30%.

PROJECTS

Wandr | React Native, Expo, Supabase, Gemini, Groq

Feb'26

- Structured an AI travel itinerary planner using React Native and Expo with personalized, day-wise trip planning.
- Integrated Gemini for itinerary generation, Groq LLaMA for AI chat, and Supabase for secure data management.
- Enhanced travel planning with real-time weather, places, maps, and personalized recommendations for each itinerary.
- Established context-aware AI workflows using RAG, API integrations, and secure Edge Functions for reliable responses.

Authentication & Subscription Management Platform | Java, Spring Boot, REST API, MySQL

Aug'25

- Architected a backend platform for secure user authentication, authorization, and subscription lifecycle management.
- Designed RESTful APIs for user registration, login, subscription plans, and account management workflows.
- Implemented role-based access control and secure validation mechanisms to protect user and subscription data in MySQL.
- Orchestrated the application using modular backend components to improve maintainability and scalability.

InTouch App | Kotlin, Android, Firebase, Firestore

Jan'25

- Developed a real-time Android communication application enabling users to securely connect and exchange messages.
- Configured Firebase Authentication and Firestore for secure user management and real-time message synchronization.
- Implemented NFC-based digital card sharing, enabling users to instantly transfer their professional card to a smartphones.
- Streamlined asynchronous data handling and application workflows for reliable real-time communication.

CERTIFICATES

Computer Networking | Google, Coursera

Feb'25

Introduction to Android Mobile Application Development | Meta, Coursera

Dec'24

Data Science | IBM, Coursera

Aug'24

ACHIEVEMENTS

- Published a research paper titled “Real Time Embedded System”, demonstrating technical research and innovation in embedded systems.
- Organized a national-level hackathon, coordinating participants, technical activities, and event execution.
- Awarded **1,00,000** cash prize for outstanding performance in a capstone engineering project.

SKILLS

Languages: C, C++, Java, Python, Kotlin, SQL, JavaScript

Frameworks: React, React Native, Spring Boot, Flask, TensorFlow, PyTorch, Scikit-learn, JSP, JDBC

Mobile & Web: Android, Android SDK, Firebase, Firestore, HTML, CSS, REST APIs

Databases & Tools: MySQL, MongoDB, PostgreSQL, Git, Docker, Google Cloud Platform, VS Code, Android Studio

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, DBMS
